

Ultrasonic measurement used for fast centering!

Straightforward and inexpensive wall thickness control at production start

Your benefit:

- Early measuring values for fast line start-up in the production of large diameter pipes
- Regular wall thickness distribution
- Fast production of „good“ quality
- Easy retrofitting

Applicable for:

- PE, PVC and PP
- Pipe diameters starting from 90 mm
- Wall thickness sizes 1,8 to 120 mm

Optional:

- Engineering package for easy retrofitting on existing calibration sleeves
or
- Flexible MAXFLEXX calibration sleeve equipped ex works with ECCO centering unit, see above

Any need for more information? Please call or send an email!
