TERAHERTZ TECHNOLOGY

QUANTUM

TERAHERTZ TECHNOLOGY

GENERAL FEATURES

- Measurement of wall thickness distribution, interior and exterior diameters, ovalness, eccentricity
- Touch-free measurement, no sealings, no dimension-related accessories required
- Automatic centering +/- 50 mm
- Automatic focussing
- Co-ex measurement
- Electronic elements based on IP65
- Full process automation (when combined with iNOEX gravimetry)
- Thin point control available
- Material savings 5 % or more
- Suitable for Industry 4.0 based on OPC-UA interface

Type	Pipe dimensions [mm/inch]
QUANTUM 360/250	32 - 250 1.25-9.84"
QUANTUM 360/400	63 - 400 2.48-15.74"
QUANTUM 360/630	90 - 630 3.54-24.80"
