

WORKSHOP SERVICE

EXPERT TRAINING

Based on our service workshop “Basic Training”, we offer you our EXPERT TRAINING course. Participants are trained the know-how to make the best use of iNOEX system concepts in order to maximize production efficiency. This allows them to keep plant availability at a high level and to optimize production processes.

Thorough knowledge on iNOEX systems will be provided to make employees internal product experts. We enable you to analyze production data, perform troubleshooting and to replace individual system components. Our EXPERT training is designed for 1-5 participants.

YOUR BENEFITS AT A GLANCE:

- Employees develop into in-house product experts and learn how to optimize production processes
- Maximizes performance, productivity levels and profits
- Higher plant efficiency through comprehensive knowledge in analysing production data
- Knowledge on how to reduce damage, failures and costs
- Performance of troubleshooting and knowledge in the replacement of system components
- Optimization of plant performance and profits through maximum plant availability
- Promotion and training of your own employees

WORKSHOP CONTENTS iNOEX EXPERT:

Our service specialists provide you with theoretical and practical knowledge on your systems in the following areas:

- Complex troubleshooting
- Diagnosis tools
- Replacement of component parts
- Controller configuration
- Software back-ups
- Restoring software
